Because every classroom should have...

**Simple and Intuitive Control**

The AV Touch Wall Control (ITC-1) is a programmable 3.5” wall panel for use with controllable amplifiers, such as the GL-300 or MS-450. The digital interface gives installers the flexibility to customize the buttons in each classroom to be perfectly suited for any compatible devices in the room. Teachers can then use the one-touch buttons to power on or off any connected device.

**Features / Specifications**
