

SAFE BADGE

SPEC SHEET

The **SAFE Badge*** is a lightweight wearable device that brings a new level of security and responsiveness to school environments. The SAFE Badge combines long-lasting battery technology with user-friendly features to ensure staff can initiate emergency alerts or lockdowns quickly and reliably from any location on campus including parking lots and sports fields.

This versatile system extends the SAFE Alert capabilities already available to teachers via their Audio Enhancement® XD Microphones, to custodians, office staff, or any personal required for comprehensive coverage. SAFE Badge also functions as a standalone solution for schools without an audio paging or intercom system, delivering dependable SAFE Alert functionality without additional infrastructure.
