

## NEW TECHNOLOGY TO ENHANCE SAFETY AND LEARNING

**Watch the new classroom technology in action!**

[Click here to watch a short video showing how these tools are helping keep our schools safe, inclusive, and effective.](#)

**We have partnered district-wide with Audio Enhancement®** to bring powerful new technology into classrooms across the county—focused on improving student safety, clear communication, and inclusive learning environments.

### **Classroom Audio Systems**

At the heart of this upgrade is a classroom audio system. Teachers now wear small microphones, ensuring every student can clearly hear lessons—no matter where they sit. This simple change has led to big improvements in student engagement and focus.

### **Instant Safety Alerts & Emergency Tools**

With the press of a button, teachers can send emergency alerts instantly. Classrooms receive visual notifications during lockdowns, and teachers confirm their rooms are secure. School administrators receive real-time updates. Integrated security systems, updated intercoms, and smart bell scheduling make school-wide responses faster and more coordinated.

### **Built-In Language Translation**

To better support our multilingual families, this new system includes built-in translation tools. Teachers and staff can communicate more effectively with students and parents in multiple languages—making every classroom more welcoming and accessible.

### **Digital Displays & Daily Communication**

InfoView digital screens are now located in hallways, displaying daily messages, announcements, clocks, and emergency alerts to keep everyone informed throughout the school day.

**Our goal is to create learning environments where every student feels safe, supported, and heard.**

If you have questions or want to learn more, please contact your school office or visit the school's district website.
