

SAFE System[®]

Signal Alert For Education

Safety meets simplicity. The Audio Enhancement[®] unified communication platform pairs the SAFE (Signal Alert For Education) System[®] with teacher microphones and lightweight SAFE Badges, using industry-standard dual-button activation to send an immediate alert from anywhere on campus. Administrators receive real-time notifications and can escalate instantly, activating coordinated campus-wide messaging through integrated paging and digital signage. Designated staff are also alerted via text, email, and app, so the right people have the same live details at the same moment, enabling faster, more confident response when it matters most.

Key Features

- Wearable devices for panic alerts
- Configurable for defined escalation to lockdowns
- Designed to work natively with campus communication tools
- Alyssa's Law Compliant with PSAP Integration available
- Personalized badge assignment allows schools to know exactly who sent an alert

Agents of Safety

Allows any staff member to be an agent of safety.

Quick Campus Communication

Sends the wearer's exact location to first responders or school safety teams for faster assistance.

Enhanced Peace of Mind

Provides staff and students with confidence that help is only a button press away, supporting a safer learning environment.
