# IP Speaker Clock

## Two Endpoints, One Box on the Wall

The Audio Enhancement® IP Speaker Clock combines synchronized timekeeping and powerful paging in one streamlined device. By replacing separate clocks and speakers, schools reduce costs, simplify installation, minimize wall clutter, and enhance building-wide communication with a single solution.

## Key Features

**Two Functions, One Device**

Synchronized time plus speaker and internal microphone all in a single unit

**Dynamic LCD Screen**

Programable LCD display for time, targeted messaging, and critical alerts when they matter most

**Clean, Consistent Look**

One solution that creates a smarter, more connected, and consistent campus environment

**AE1 Certified**

Part of the Audio Enhancement AE1 Platform, bringing communication, safety, and efficiency together
